OPTIMUM DATA TECH

[Optimum Performance Data Technologies and Services](#), doing business as **Optimum Data Tech**, was established back in 2014. The company was initially focused in the design, construction and implementation of Data Center Infrastructure Facilities but has branched out extensively from that point to the present.

To date, the team of **Optimum Data Tech** is comprised of **Certified Architects, Civil, Electrical and Mechanical Engineers, IT's and Web Developers**, all with solid experience in their respective fields.

The combined Engineering and IT staff have become legitimate experts in the designing, deployment, implementation and management of **Data Centers, UPS and Power Protection, Centralized Facility Systems**, as well as **Remote Management Capabilities, or Cloud Server Hosting**.

As far as equipment and hardware, the company has officially partnered with several trusted name brands and have direct access to their main distributors, as well as their manufacturing facilities abroad. This is to ensure that the quality, along with the service, being provided to clients are unquestionable. A functioning and stocked warehouse is already established locally as well for any additional and immediate needs that clients may require.

- The company's **Quality Management System** is focused on consistently meeting consumer requirements and enhancing consumer satisfaction, which is aligned and compliant with **ISO9001:2015**.
